# The Crucified God: The Cross of Christ As the Foundation and Criticism of Christian Theology

Jürgen Moltmann

"This is Jürgen Moltmann's top & consequently most crucial book. He has considerably replaced the imperative thrust of his The Crucified God: The Cross of Christ As the Foundation and Criticism of Christian Theology theology with out sacrificing its most important element, its passionate situation for relief of the world's suffering."--Langdon Gilkey"The Crucified God rewards, because it demands, the reader's sufferer & open-minded attention, for its subject matter is not anything except the "explosive presence" of the sighting & releasing Spirit of God in the course of human life."--The evaluate of Books & faith

Moltmann has an immense point of view on Theology and Christology, and as a post-war theologian, he rather is aware the obstructions and problems that WWII dropped at conventional theology, and his solutions to a couple of the questions that those occasions pose is absolutely particularly stunning. One of the the issues that struck me approximately this publication is Moltmann's The Crucified God: The Cross of Christ As the Foundation and Criticism of Christian Theology redefinition of love. He shifts his point of view from considering love as a divinely-given excellent of happiness and pleasure to a extra reasonable figuring out of affection which defines the be aware extra as a gap up of one's self to being wounded. This turns out to make experience for the Christian The Crucified God: The Cross of Christ As the Foundation and Criticism of Christian Theology narrative and the idea that of God engaging in reality, instead of floating above it like a good tease that has selected to relinquish its superb presents for a few divinely capricious reason. He stresses additionally that during order to prevent Docetism, it really is vital to appreciate that God, in Christ, suffered in God's completeness, not only in a small, annexed part. This brings a paradox during which an everlasting God suffers and dies, yet Moltmann stresses that this paradox, and the feedback that it needs to bring about itself, is as vital to the Christian religion because the go itself. for this reason the sub-title of the book, which turns out to indicate that the go is an inherently self-critical event, which either speaks of a imaginative and prescient of God and but is deserted through that very God within the similar space, that's fascinating. Lastly, he ends the ebook with a holistic interpretation of salvation and the kingdom, along with liberation on all fronts: psychological, political, etc. This turns out to me to make extra feel than simply wondering humans as non secular beings with different components in their lives which are vestigial at best. we're conglomerates, accordingly Moltmann needless to say to be able to be loose to be human in a single point of our existence as somebody and as a society, we needs to deliver freedom into each aspect. I enjoyed this book, and whereas it used to be very dense and there have been a few issues the place Moltmann fees untranslated Latin, which went thoroughly over my head, I do imagine that it The Crucified God: The Cross of Christ As the Foundation and Criticism of Christian Theology is a very improtant paintings and a must-read for an individual drawn to rethinking the move in mild of an international that doesn't help the belief of an omnipotent, non-suffering God.
